

CASE STUDY: RAIL

BRITISH GAS STOCKPORT

THE STORY

Everlast successfully completed the refurbishment of the Stockport call centre roof, delivering a seamless upgrade to the building's waterproofing system.

The project involved the removal of approximately 4,500m² of existing waterproofing and the installation of a Westwood built-up waterproofing system, ensuring long-term protection and durability.

As part of the works, all PV panels and AC condenser units were carefully removed and reinstated with the support of our M&E contractor partners. In addition, a permanent fixed guard rail was installed around the full perimeter of the building, enhancing safety for ongoing maintenance activities.

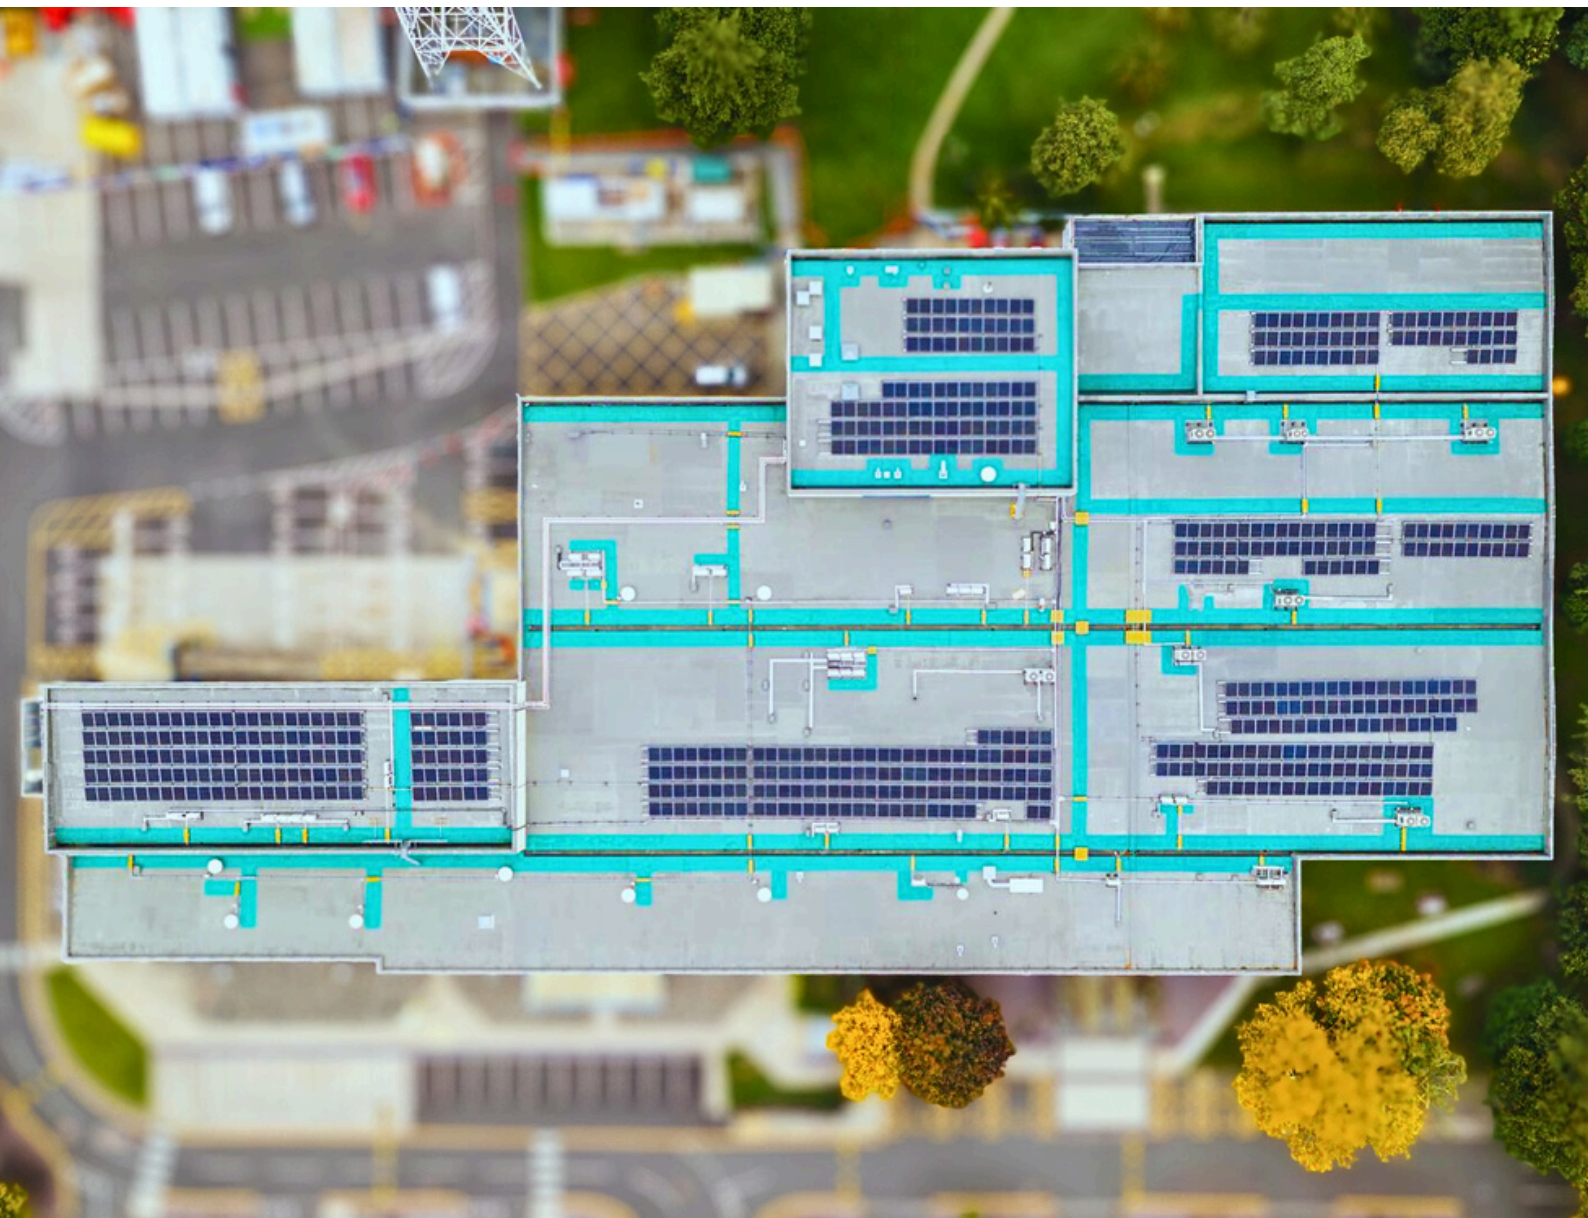

All works were completed without any disruption to the business, demonstrating Everlast's commitment to meticulous planning and collaborative execution. The project benefitted from excellent teamwork across all involved, delivering a high-quality outcome on time and to specification.

FACT FILE

Client:	British Gas
Project:	Refurbishment - Roofing & Waterproofing
Building:	Full Site
Location:	Stockport
Timescale:	Completed
Products Used:	Westwood Built-up Waterproofing System Permanent Fixed Guard Rail installed
Project Size:	4,500 m ²
